Work breakdown

Gregors part

```
ChangingLSB(String binary, Int payloadBit){
        if(payloadBit != binary.lastcharacter){
                change last char in string binary to payload bit
        }
        return binary
}
```

Johns part

Function to get next payload bit & payload info

Nathans part

Get binary of red
get payload bit – Johns part
call ChangingLSB
set red to what ChangingLSB returns

Repeat for green and blue

Set RGB values of pixel to the new ones
